## EXPERIENCE

---

### Ernst & Young

Hoboken, NJ

*FSO Technology Risk Consulting Intern*

June 2024 - August 2024

- Conducted IT audit control walkthrough and testing documentation on a large Financial Service Organization to provide opinions on IT security and operational effectiveness.
- Reviewed SQL statements and programming code to observe the codes intended use case and its output into the client's databases.

### JPMorgan Chase & Co.

Jersey City, NJ

*Internal Audit Summer Analyst*

June 2023 - August 2023

- Produced comprehensive documentation for Transfers and Build/Earn audits during the testing phases
- Conducted thorough analysis of SQL statements to determine optimal testing data origination from appropriate internal databases and devised methodologies for data manipulation to facilitate problem identification
- Identified and addressed an audit control issue, taking a leadership role alongside the manager to assess the issue's scope and risk level based on impact to the organization and its clientele

### National Retail Systems

Lyndhurst, NJ

*Supply Chain Intern*

June 2022 - May 2023

- Finalized a Capital Expenditure Project through the development of a cost optimized asset replacement model for all assets in the company. This analysis leveraged 5 years of history to determine the Total Cost of Ownership (TCO) optimizing asset replacement decisions
- Developed an Operational Analysis of the Impact of a New Entrance to the main yard in a large NJ Warehouse. Determined large financial savings through the installation of a 2nd gate to route traffic. This analysis involved the collection of over 1 million data entries for switcher moves over a 3 year timeframe
- Analyzed the impact of a new California Energy law, WAIRE Program, requiring the use of electric equipment in California based warehouses. Non-compliance with this law would cost the company millions of dollars in annual fines.
